

Invitation to our spring exhibition at Theisen & Bonitz from 15. - 16.03.2022

we would like to invite you to view and test our latest tb flex system. As part of our spring exhibition, the following brochure system for DIN A4 landscape products is available:

Collator tb flex B 320 SP (35 x 64 cm) with automatic transport table adjustment and motorized adjustable creasing in combination with an automatic stitch-fold-trim tb flex S 204 QSM with three-sided trim.

This combination adjusts automatically to each new job and up to 5000 brochures per hour are produced with a scored cover sheet.

In the left run, the collator can work in a continuous pile delivery, in a delivery jogger or in a calendar binding system.

The automatic setting via input on the display, retrieval of stored data in the machine or simply via QR code makes handling the system easy, quick and error-free.

Together with the high performance and the flexibility through right and left run and the associated possibilities of use, the Theisen & Bonitz system is the most economical solution in its field of application.

There will also be high-performance, factory-reconditioned used machines on display, such as the tb sprint B 316 VP with 304 QSM.

Due to the Corona situation, we ask that all participants register in advance
Tel.: +49 21 74 / 6 73-0 or by e-mail to info@theisen-bonitz.de.

The event will take place on the basis of the current statutory Corona regulations and the clear Corona hygiene concept, as with a visit to a restaurant, 2G plus (boostered or current negative test) to follow.

Due to the constantly changing situation, participants should therefore find out about the current regulations in good time.

We look forward to seeing you, your Theisen & Bonitz team
