

Dear customers, interested parties and sales partners,

On August 1st and 2nd we can show you a fully automatic TB Flex B 320 SP with a format depth of 65 cm here in Burscheid from 10 a.m. to 5 p.m..

In order to achieve the open format of 50 x 65 cm, every second pile wall can be removed and, in addition to the normal brochures in the A4 area, brochures in the A3 area can also be conveniently covered. The customer's wish to create new lighting for faster orientation was also successfully recognized and is certainly future-oriented.

Our demo machine tb sprint B 315 SP with 304 QSM with motorized stitching head adjustment is also available for you. This equipment is quickly always chosen today, because automating the stitching head adjustment is the most important part of the adjustment. In addition, the upper and lower tools are always exactly on top of each other and the setting via the display is simply very convenient.

If we haven't already done so, we would also like to provide you with the current list of our used systems in the appendix.

Of particular interest is a fully automatic TB Flex B 316 SP with autom. TB Flex S 204 QSM from 2016 or a small layout, the TB Sprint B 206 VP with 204 from 2012, both expected in August.

The tb sprint B 310 VP with 303 QSM from 2004 is overhauled and ready for demonstration, as is the tb sprint B 307 VP from 2005.

Please contact us for an offer.

Nice summer days and hopefully we see us here August 1st or 2nd. As always, your physical well-being will be taken care of.

We kindly ask you to register at +49 2174-673-0 or A.Theisen@Theisen-Bonitz.de.

Best regards
Achim Theisen

Open house:

1st-2nd August 2023 from 10 a.m. to 5 p.m. at Theisen & Bonitz.

We kindly ask you to register at 02174-673-0 or A.Theisen@Theisen-Bonitz.de.
